# Introduction to
# Archimede®

Archimede is our highest rated product, it's the answer to the accounting and managerial problems of your company. An easy-to-use accounting software for small and middle businesses.

Archimede is not at all a commercial off-the-shelf product. **It is completely customizable for the customer's needs. Our strength and distinctive characteristic is that Archimede is written and designed to meet the customer's specific business processes.**

Archimede is a **modular, scalable and integrated system**, it consists of modules that can be installed independently of each other, it allows the integration of further modules while growing demands. Its structure let adopt the necessary procedures for the carrying out of own activities. Each module is connected to the other by means of common information on database to which every program accesses, when necessary, to obtain or update data.

It is a **multi-user** and **multi company** procedure.

It is a flexible and parametric software, with possibility of complete personalization and / or creation of ad hoc modules for any customer's needs.

Archimede is a system that ensures **maximum safety for users**. To access the program, it requires a login and a password. It is possible to set different access levels for each user/group of users, depending on their business needs and to restrict the use and/or the display some parts of the program. In addition, a privileged user can access, always bound by a password, the "event log". This procedure allows to trace all relevant operations performed by each operator.

Archimede respects the legislation concerning privacy. Among other things it can remind you to change password every 6 months and make sure its composition fulfils rules laid down by legislation.

Eurosoft staff provides a direct and unlimited assistance to users who choose a maintenance contract. **Assistance is guaranteed through phone, email or remote assistance.** Customers may also require a remote assistance or open a "service ticket" directly from Archimede menu "assistance" or from the website www.eurosoftsrl.it.  For each program of Archimede there is an up-to-date online printable guide, available at all times. By pressing the function key F1, it will open a contextual help explaining each field and describing specific functionalities.

As Archimede has been developed using exclusively Microsoft languages of software development, this guarantees a total compatibility with the operative system and with all applications of individual productiveness of Microsoft Office, all data can be exported to Excel/Access.

Archimede aims to facilitate you in difficult tasks to manage your work at best. One of the things that distinguishes our procedure is to allow an easy and fast data research and consultation, able to perform your need for speed and immediacy. In loading data, you can use "filter" features such as "find" and "find all". The "help" window can be sorted by any columns and filtered by the same features above. Research for parts of words and parts of codes are just some of the possibilities that Archimede offers, in addition to numerous features ability of customizable lists.

Archimede allows sending any documents or reports by e-mail or by certified electronic mail (PEC), without the aid of an external e-mail program, but simply configuring on Archimede users e-mail address settings.

Archimede allows you to customize, depending on the task carried out by the user in the company, the opening menu configuration. Infact, on every single pc station it can be configured a number of quick keys, aimed at facilitating the opening of the most used programs. It also shows a tab called "favourites" with your 10 more used programs

Archimede is a product created with Microsoft "Visual Basic" and ". NET" development languages.  Realized in 32/64 bit technology using MSSQL Server database.

Pc with 1.8 Ghz processor with 512 MB of Ram, DVD drive, graphic card with minimum 1024 x 768 resolution; 10 Gb of free space, Windows 7.

**RECOMMENDED SYSTEM REQUIREMENTS (for installation on Client):**

 Pc with Core 2/Duo processor or AMD Quad core with 4 GB Ram, DVD drive, graphic card with resolution to be decided depending on the monitor available. 20 Gb of free space or more based on the amount of data to be processed, Windows 10.

Eurosoft provides professional IT services, with particular attention to the quality and development of accounting/management software. Its procedures are addressed to small and medium-sized business, for which Eurosoft provides analytical and programming assistance for developing custom business projects in advanced technology.

Eurosoft is also able to provide body-rental upon specific request, installation of hardware equipment and maintain their efficiency over time through a network of specialized technicians.

Eurosoft has cooperated with its customers for more than 30 years, since 1980 as Corporate Software Division within the P. S. G S.a.S. Valletti & C. then from 1989 as a stand-alone company.

While the P. S. G. works in tax software branch for tax consultants, Eurosoft has developed accounting and management software for companies and professionals in DOS, Windows and PC networks.

Nowadays Eurosoft can offer many standard procedures, renewed year by year using tools offered by new technologies. Among the modular packages, it should be remembered **Archimede** (business management), **Teseo** (technical studies), **Ulisse** (hotel management) and **Minerva** (digital archiving).

We can also customize any program starting from our procedures according to customer requirements, create new options, manage import from other software. Each procedure can interface with Ms Office and Open Office.

Eurosoft offers direct assistance on its procedures, both with interventions at customer site, either by telephone support or remote support. It offers an annual maintenance contract which guarantees the complete software support.

Support may be extended on public holidays if needed. We also offer training/assistance on all Office procedures and we organize courses on demand.

Since some years Eurosoft has also developed a consolidated experience in the Internet world, creating web pages graphically appealing, with static or dynamic content.
Those with dynamic content are based on MS Access and MSSQL databases and are directly editable by the user.

Eurosoft by 2012 has extended its business aim with a new branch of activity.
In fact, with **Eurosonic** it is now present in the important field of video surveillance.
Eurosonic with an innovative technology allows you to keep constantly under control your home or your office through a pc, tablet, smartphone via Internet.
You can find all information about Eurosonic on website www.eurosonic.it

Since 2016 Eurosoft di Valletti change its company name and became **Eurosoft Srl**
